CONTENTS OF VOLUME 45

No. 1–2 (pp 1–298) published March 1996
No. 3 (pp 299–446) published April 1996
No. 4 (pp 447–574) published May 1996
No. 5 (pp 575–722) published June 1996
No. 6 (pp 723–864) published July 1996

Abate C, Callieri D, Rodríguez E, Garro O: Ethanol production by a mixed culture of flocculent strains of *Zymomonas mobilis* and *Saccharomyces* sp. 580

Annous BA, Shieh J-S, Shen G-J, Jain MK, Zeikus JG: Regulation of hydrogen metabolism in *Butyribacterium methylotrophicum* by substrate and pH 804

Anwar MN, Suto M, Tomita F: Isolation of mutants of *Penicillium purpurogenum* resistant to catabolite repression (Short contribution) 684

Arino S, Marchal R, Vandecasteele J-P: Identification and production of a rhamnolipidic biosurfactant by a *Pseudomonas* species 162

Babu GRV, Vijaya OK, Ross VL, Wolfram JH, Chapatwala KD: Cell-free extract(s) of *Pseudomonas putida* catalyzes the conversion of cyanides, cyanates, thiocyanates, formamide, and cyanide-containing mine waters into ammonia 273

Balakrishnan K, Pandey A: Influence of amino acids on the biosynthesis of cyclosporin A by *Tolypocladium inflatum* 800

Benson KH, Godon J-J, Renault P, Griffin HG, Gasson MJ: Effect of *ilvBN*-encoded α-acetolactate synthase expression on diacetyl production in *Lactococcus lactis* 107

Birk R, Bravdo B, Shoseyov O: Detoxification of cassava by *Aspergillus niger* B-1 (Short contribution) 411

Birman I, Alexander M: Optimizing biodegradation of phenanthrene dissolved in nonaqueous-phase liquids 267

Bock C, Kroppenstedt RM, Diekmann H: Degradation and bioconversion of aliphatic and aromatic hydrocarbons by *Rhodococcus ruber* 219 (Short contribution) 408

Bock C, Kroppenstedt RM, Schmidt U, Diekmann H: Degradation of prochloraz and 2,4,6-trichlorophenol by environmental bacterial strains 257

Bossier P, Verstraete W: Triggers for microbial aggregation in activated sludge? 1

Bouchez M, Blanchet D, Vandecasteele JP: The microbiological fate of polycyclic aromatic hydrocarbons: carbon and oxygen balances for bacterial degradation of model compounds 556

Brézillon C, Kroon PA, Faulds CB, Brett GM, Williamson G: Novel ferulic acid esterases are induced by growth of *Aspergillus niger* on sugar-beet pulp 371

Brinkmann U, Babel W: Simultaneous utilization of pyridine and fructose by *Rhodococcus opacus* UFZ B 408 without an external nitrogen source 217

Bui DM, Kunze I, Horstmann C, Schmidt T, Breunig KD, Kunze G: Expression of the *Arxula adeninivorans* glucoamylase gene in *Kluyveromyces lactis* 102

Butler MJ, Aphale JS, Binnie C, DiZonno MA, Krygsman P, Soltes G, Walczyk E, Malek LT: Cloning and analysis of a gene from *Streptomyces lividans* 66 encoding a novel secreted protease exhibiting homology to subtilisin BPN′ 141

Calvillo YM, Alexander M: Mechanism of microbial utilization of biphenyl sorbed to polyacrylic beads 383

Carlozzi P, Torzillo G: Productivity of *Spirulina* in a strongly curved outdoor tubular photobioreactor 18

Cho H-Y, Yousef AE, Yang S-T: Continuous production of pediocin by immobilized *Pediococcus acidilactici* PO2 in a packed-bed bioreactor 589

Clark TR, Roberto FF: *Methylosinus trichosporium* OB3b whole-cell methane monooxygenase activity in a biphasic matrix 658

Clausen CA, Green F III: Characterization of polygalacturonase from the brown-rot fungus *Postia placenta* 750

Colocousi A, Saqib KM, Leak DJ: Mutants of *Pseudomonas fluorescens* NCIMB 11671 defective in the catabolism of α-pinene 822

Cox HHJ, Magielsen FJ, Doddema HJ, Harder W: Influence of the water content and water activity on styrene degradation by *Exophiala jeanselmei* in biofilters 851

Dammann-Kalinowski T, Niemann S, Keller M, Selbitschka W, Tebbe CC, Pühler A: Characterization of two bioluminescent *Rhizobium meliloti* strains constructed for field releases (Short contribution) 509

Dantigny P, Gruber M: Transition rate kinetics from ethanol oxidation to glucose utilisation within a structured model of baker's yeast 199

Das A, Mishra AK: Role of *Thiobacillus ferrooxidans* and sulphur(sulphide)-dependent ferric-ion-reducing activity in the oxidation of sulphide minerals 377

dos Santos VAPM, Bruijnse M, Tramper J, Wijffels RH: The magic-bead concept: an integrated approach to nitrogen removal with co-immobilized micro-organisms 447

Dwivedi PP, Gibbs MD, Saul DJ, Bergquist PL: Cloning, sequencing and overexpression in *Escherichia coli* of a xylanase gene, *xynA* from the thermophilic bacterium Rt8B.4 genus *Caldicellulosiruptor* 86

Faber KN, Westra S, Waterham HR, Keizer-Gunnink I, Harder W, Ab G, Veenhuis M: Foreign gene expression in *Hansenula polymorpha.* A system for the synthesis of small functional peptides 72

Fabritius D, Schäfer HJ, Steinbüchel A: Identification and production of 3-hydroxy-Δ^9-*cis*-1,18-octadecenedioic acid by mutants of *Candida tropicalis* 342

Fava F, Di Gioia D, Marchetti L, Quattroni G: Aerobic dechlorination of low-chlorinated biphenyls by bacterial biofilms in packed-bed batch bioreactors 562

Fernández-Espinar MT, Vallés S, Piñaga F, Pérez-González JA, Ramón D: Construction of an *Aspergillus nidulans* multicopy transformant for the *xlnB* gene and its use in purifying the minor X_{24} xylanase (Short contribution) 338

Ferrero MA, Castro GR, Abate CM, Baigorí MD, Siñeriz F: Thermostable alkaline proteases of *Bacillus licheniformis* MIR 29: isolation, production and characterization 327

Gemeren IA van, Beijersbergen A, Musters W, Gouka RJ, Hondel CAMJJ van den, Verrips CT: The effect of pre- and prosequences and multicopy integration on heterologous expression of the *Fusarium solani pisi* cutinase gene in *Aspergillus awamori* 755

Gomez JGC, Rodrigues MFA, Alli RCP, Torres BB, Bueno Netto CL, Oliveira MS, da Silva LF: Evaluation of soil gram-negative bacteria yielding polyhydroxyalkanoic acids from carbohydrates and propionic acid 785

Gottschalk TE, Nielsen JE, Rasmussen P: Detection of endogenous β-glucuronidase activity in *Aspergillus niger* 240
Grahl T, Märkl H: Killing of microorganisms by pulsed electric fields 148
Hale VA, Schottel JL: Mutational analysis of the *Streptomyces scabies* esterase signal peptide 189
Hallberg KB, Sehlin HMB, Lindström E: Toxicity of arsenic during high temperature bioleaching of gold-bearing arsenical pyrite 212
Harper EG, Welch RP, Contreras Lara D, Chang JS, Calza RE: The effect of *Aspergillus oryzae* fermentation extract on the anaerobic fungi *Neocallimastix frontalis* EB 188, *Piromyces communis* DC 193 and *Orpinomyces* ssp. RW 206: generalized effects and component analysis 817
Hartke A, Benachour A, Boutibonnes P, Auffray Y: Characterisation of a complex restriction/modification system detected in a *Bifidobacterium longum* strain 132
Heald SC, Jenkins RO: Expression and substrate specificity of the toluene dioxygenase of *Pseudomonas putida* NCIMB 11767 56
Herzog RW, Daniell H, Singh NK, Lemke PA: A comparative study on the transformation of *Aspergillus nidulans* by microprojectile bombardment of conidia and a more conventional procedure using protoplasts treated with polyethyleneglycol (Short contribution) 333
Hounsa CG, Aubry JM, Dubourguier HC, Hornez JP: Application of factorial and Doehlert designs for optimization of pectate lyase production by a recombinant *Escherichia coli* 764
Huang C-M, Asmundson RV, Kelly WJ: Characterization of a temperate phage isolated from *Leuconostoc oenos* strain 1002 472
Hudson JA, Mackenzie CAM, Joblin KN: Factors affecting the formation of 10-hydroxystearic acid from oleic acid by a ruminal strain of *Enterococcus faecalis* (Short contribution) 404
Hujanen M, Linko Y-Y: Effect of temperature and various nitrogen sources on L(+)-lactic acid production by *Lactobacillus casei* 307
Iimura Y, Hartikainen P, Tatsumi K: Dechlorination of tetrachloroguaiacol by laccase of white-rot basidiomycete *Coriolus versicolor* 434
Ikeda K, Masujima T, Suzuki K, Sugiyama M: Cloning and sequence analysis of the highly expressed melanin-synthesizing gene operon from *Streptomyces castaneoglobisporus* 80
Jahng D, Wood TK: Metal ions and chloramphenicol inhibition of soluble methane monooxygenase from *Methylosinus trichosporium* OB3b 744
Jain RK: The molecular cloning of genes specifying some enzymes of the 3,5-xylenol degradative pathway 502
Kastner JR, Roberts RS, Jones WJ: Effect of pH on cell viability and product yields in D-xylose fermentations by *Candida shehatae* 224
Kataoka N, Tokiwa Y, Tanaka Y, Takeda K, Suzuki T: Enrichment culture and isolation of slow-growing bacteria 771
Kato M, Bao HJ, Kang C-K, Fukui T, Doi Y: Production of a novel copolyester of 3-hydroxybutyric acid and medium-chain-length 3-hydroxyalkanoic acids by *Pseudomonas* sp. 61-3 from sugars 363
Kimura H, Miyashita H, Sumino Y: Organization and expression in *Pseudomonas putida* of the gene cluster involved in cephalosporin biosynthesis from *Lysobacter lactamgenus* YK90 490
Kirchner K, Wagner S, Rehm H-J: Removal of organic air pollutants from exhaust gases in the trickle-bed bioreactor. Effect of oxygen 415
Klapatch TR, Demain AL, Lynd LR: Restriction endonuclease activity in *Clostridium thermocellum* and *Clostridium thermosaccharolyticum* 127
Kobayashi M, Fujita T, Shimizu S: Hyperinduction of nitrile hydratase acting on indole-3-acetonitrile in *Agrobacterium tumefaciens* 176
Kobayashi T, Hakamada Y, Hitomi J, Koike K, Ito S: Purification of alkaline proteases from a *Bacillus* strain and their possible interrelationship 63
König A, Zaborosch C, Muscat A, Vorlop K-D, Spener F: Microbial sensors for naphthalene using *Sphingomonas* sp. B1 or *Pseudomonas fluorescens* WW4 844
Kuek C: Shake-flask culture of *Laccaria laccata*, an ectomycorrhizal basidiomycete 319
Kumar V, Fuente JL de la, Leitão AL, Liras P, Martín JF: Effect of amplification or targeted disruption of the β-lactamase gene of *Nocardia lactamdurans* on cephamycin biosynthesis 621
Kurakake M, Onoue T, Komaki T: Effect of pH on transfructosylation and hydrolysis by β-fructofuranosidase from *Aspergillus oryzae* 236
Lacki K, Duvnjak Z: Comparison of three methods for the determination of sinapic acid ester content in enzymatically treated canola meals 530
Larsen J, Joergensen L: Reduction of RNA and DNA in *Methylococcus capsulatus* by endogenous nucleases 137
Lee S-G, Kim S, Robbins PD, Kim BG: Optimization of environmental factors for the production and handling of recombinant retrovirus 477
Lelieveld HLM, Boon B, Bennett A, Brunius G, Cantley M, Chmiel A, Collins CH, Crooy P, Doblhoff-Dier O, Economidis I, Elmqvist A, Frontali-Botti C, Havenaar R, Haymerle H, Käppeli O, Leaver G, Lex M, Lund S, Mahler JL, Marris R, Martinez JL, Mosgaard Ch, Normand-Plessier C, Romantschuk M, Rudan F, Wagner K, Werner RG (Working Party "Safety in Biotechnology" of the European Federation Biotechnology): Safe biotechnology. 7. Classification of microorganisms on the basis of hazard 723
Lin M-Y, Harlander S, Savaiano D: Construction of an integrative food-grade cloning vector for *Lactobacillus acidophilus* 484
Lounès A, Lebrihi A, Benslimane C, Lefebvre G, Germain P: Regulation of spiramycin synthesis in *Streptomyces ambofaciens:* effects of glucose and inorganic phosphate 204
Martius GGS, Wießner A, Stottmeister U: Degradation efficiency and molecular size alteration during the aerobic microbial treatment of lignite pyrolysis deposit water 692
Matis KA, Zouboulis AI, Grigoriadou AA, Lazaridis NK, Ekateriniadou LV: Metal biosorption – flotation. Application to cadmium removal 569
Matsunaga T, Sudo H, Takemasa H, Wachi Y, Nakamura N: Sulfated extracellular polysaccharide production by the halophilic cyanobacterium *Aphanocapsa halophytia* immobilized on light-diffusing optical fibers 24
Matsusaki H, Endo N, Sonomoto K, Ishizaki A: Lantibiotic nisin Z fermentative production by *Lactococcus lactis* IO-1: relationship between production of the lantibiotic and lactate and cell growth 36
Mayer AF, Deckwer W-D: Simultaneous production and decomposition of clavulanic acid during *Streptomyces clavuligerus* cultivations 41
Meesters PAEP, Huijberts GNM, Eggink G: High-cell-density cultivation of the lipid accumulating yeast *Cryptococcus curvatus* using glycerol as a carbon source 575
Miranda J, Membrillo-Hernández J, Tabche ML, Soberón M: *Rhizobium etli* cytochrome mutants with derepressed expression of cytochrome terminal oxidases and enhanced symbiotic nitrogen accumulation 182
Misra G, Pavlostathis SG, Perdue EM, Araujo R: Aerobic biodegradation of selected monoterpenes 831
Moilanen AM, Lundell T, Vares T, Hatakka A: Manganese and malonate are individual regulators for the production of lignin and manganese peroxidase isozymes and in the degradation of lignin by *Phlebia radiata* 792
Mollenkopf H-J, Gentschev I, Bubert A, Schubert P, Goebel W: Extracellular PagC-HlyA$_S$ fusion protein for the generation and identification of *Salmonella*-specific antibodies 629

Morbach S, Kelle R, Winkels S, Sahm H, Eggeling L: Engineering the homoserine dehydrogenase and threonine dehydratase control points to analyse flux towards L-isoleucine in *Corynebacterium glutamicum* 612
Nowak J, Kirsch NH, Hegemann W, Stan H-J: Total reductive dechlorination of chlorobenzenes to benzene by a methanogenic mixed culture enriched from Saale river sediment 700
Nyavor K, Egiebor NO, Fedorak PM: The effect of ferric ion on the rate of ferrous oxidation by *Thiobacillus ferrooxidans* (Short contribution) 688
Okeke BC, Smith JE, Paterson A, Watson-Craik IA: Influence of environmental parameters on pentachlorophenol biotransformation in soil by *Lentinula edodes* and *Phanerochaete chrysosporium* 263
Pagot Y, Belin J-M: Fatty acid cellular metabolism and lactone production by the yeast *Pichia guilliermondii* 349
Paradis FW, Shareck F, Dupont C, Kluepfel D, Morosoli R: Expression and secretion of β-glucuronidase and *Pertussis* toxin S1 by *Streptomyces lividans* 646
Passador-Gurgel GC, Furlan SA, Meller JK, Jonas R: Application of a microtitre reader system to the screening of inulinase-producing yeasts 158
Pazlarová J, Votruba J: Use of zeolite to control ammonium in *Bacillus amyloliquefaciens* α-amylase fermentations 314
Perez Oseguera MA, Guereca L, Lopez-Munguia A: Properties of levansucrase from *Bacillus circulans* 465
Planas J, Rådström P, Tjerneld F, Hahn-Hägerdal B: Enhanced production of lactic acid through the use of a novel aqueous two-phase system as an extractive fermentation system 737
Pothuluri JV, Evans FE, Heinze TM, Cerniglia CE: Formation of sulfate and glucoside conjugates of benzo[*e*]pyrene by *Cunninghamella elegans* 677
Reij MW, Hartmans S: Propene removal from synthetic waste gas using a hollow-fibre membrane bioreactor 730
Reimann A, Biebl H, Deckwer W-D: Influence of iron, phosphate and methyl viologen on glycerol fermentation of *Clostridium butyricum* 47
Requena N, Azcón R, Baca MT: Chemical changes in humic substances from compost due to incubation with ligno-cellulolytic microorganisms and effects on lettuce growth 857
Rikken GB, Kroon AGM, van Ginkel CG: Transformation of (per)chlorate into chloride by a newly isolated bacterium: reduction and dismutation 420
Roche N, Durand A: Kinetics of *Thermoascus aurantiacus* solid-state fermentation on sugar-beet pulp – polysaccharide alteration and production of related enzymatic activities 584
Rodríguez A, Falcón MA, Carnicero A, Perestelo F, De la Fuente G, Trojanowski J: Laccase activities of *Penicillium chrysogenum* in relation to lignin degradation 399
Rodríguez Monroy M, de la Torre M: Effect of the dilution rate on the biomass yield of *Bacillus thuringiensis* and determination of its rate coefficients under steady-state conditions 546
Rozés N, Peres C: Effect of oleuropein and sodium chloride on viability and metabolism of *Lactobacillus plantarum* (Short contribution) 839
Rugsaseel S, Kirimura K, Usami S: Citric acid accumulation by cycloheximide-sensitive mutant strains of *Aspergillus niger* 28
Saha BC, Bothast RJ: Production of L-arabitol from L-arabinose by *Candida entomaea* and *Pichia guilliermondii* 299
Sakamoto S, Terada I, Lee Y-C, Uehara K, Matsuzawa H, Iijima M: Efficient production of *Thermus* protease aqualysin I in *Escherichia coli:* effects of cloned gene structure and two-stage culture 94
Schönduve P, Sára M, Friedl A: Influence of physiologically relevant parameters on biomass formation in a trickle-bed bioreactor used for waste gas cleaning 286
Schräder T, Andreesen JR: Studies on the inactivation of the flavoprotein D-amino acid oxidase from *Trigonopsis variabilis* 458
Seignez C, Adler N, Suard JC, Péringer P: Aerobic and anaerobic biodegradability of 1-Anthraquinone sulphonate (Short contribution) 719
Shen G-J, Annous BA, Lovitt RW, Jain MK, Zeikus JG: Biochemical route and control of butyrate synthesis in *Butyribacterium methylotrophicum* 355
Shooner F, Tyagi RD: Thermophilic microbial leaching of heavy metals from municipal sludge using indigenous sulphur-oxidizing microbiota 440
Simmons P, Singleton I: A method to increase silver biosorption by an industrial strain of *Saccharomyces cerevisiae* 278
Slininger PJ, Van Cauwenberge JE, Bothast RJ, Weller DM, Thomashow LS, Cook RJ: Effect of growth culture physiological state, metabolites, and formulation on the viability, phytotoxicity, and efficacy of the take-all biocontrol agent *Pseudomonas fluorescens* 2–79 stored encapsulated on wheat seeds 391
Smet E, Chasaya G, Van Langenhove H, Verstraete W: The effect of inoculation and the type of carrier material used on the biofiltration of methyl sulphides 293
Stathopoulos C, Georgiou G, Earhart CF: Characterization of *Escherichia coli* expressing an Lpp′OmpA(46–159)-PhoA fusion protein localized in the outer membrane 112
Stefess GC, Torremans RAM, de Schrijver R, Robertson LA, Kuenen JG: Quantitative measurement of sulphur formation by steady-state and transient-state continuous cultures of autotrophic *Thiobacillus* species 169
Sullivan JP, Chase HA: 1,2,3-Trichlorobenzene transformation by *Methylosinus trichosporium* OB3b expressing soluble methane monooxygenase 427
Sun AK, Wood TK: Trichloroethylene degradation and mineralization by pseudomonads and *Methylosinus trichosporium* OB3b 248
Sun W-Q, Meng M, Kumar G, Geelhaar LA, Payne GF, Speedie MK, Stacy JR: Biological denitration of propylene glycol dinitrate by *Bacillus* sp. ATCC 51912 525
Sunna A, Antranikian G: Growth and production of xylanolytic enzymes by the extreme thermophilic anaerobic bacterium *Thermotoga thermarum* 671
Sztajer H, Wang W, Lünsdorf H, Stocker A, Schmid RD: Purification and some properties of a novel microbial lactate oxidase 600
Takamatsu H, Hamamoto K, Ishimaru K, Yokoyama S, Tokashiki M: Large-scale perfusion culture process for suspended mammalian cells that uses a centrifuge with multiple settling zones (Short contribution) 454
Terashima M, Kawai M, Kumagai MH, Rodriguez RL, Katoh S: Characteristics of a chimeric enzyme engineered from two rice α-amylase isozymes 607
Tijhuis L, Hijman B, Van Loosdrecht MCM, Heijnen JJ: Influence of detachment, substrate loading and reactor scale on the formation of biofilms in airlift reactors 7
Tschierske M, Drechsel H, Jung G, Zähner H: Production of rhizoferrin and new analogues obtained by directed fermentation 664
Umemura I, Yanagiya K, Komatsubara S, Sato T, Tosa T: A *Candida maltosa* mutant defective in alanine aminotransferase: isolation and L-alanine assimilation 519
Verhagen FJM, Swarts HJ, Kuyper TW, Wijnberg JBPA, Field JA: The ubiquity of natural adsorbable organic halogen production among basidiomycetes 710
Vesanto E, Peltoniemi K, Purtsi T, Steele JL, Palva A: Molecular characterization, over-expression and purification of a novel dipeptidase from *Lactobacillus helveticus* 638
Wada M, Beppu T, Horinouchi S: Integrative transformation of the zygomycete *Rhizomucor pusillus* by homologous recombination (Short contribution) 652
Welch RP, Tsai K-P, Harper EG, Chang JS, Calza RE: The effect of *Aspergillus oryzae* fermentation extract on the anaerobic

fungus *Neocallimastix frontalis* EB 188: effects on physiology 811

Wilhite SE, Straney DC: Timing of gliotoxin biosynthesis in the fungal biological control agent *Gliocladium virens* (*Trichoderma virens*) 513

Wood TM, McCrae SI: Arabinoxylan-degrading enzyme system of the fungus *Aspergillus awamori*: purification and properties of an α-L-arabinofuranosidase 538

Xu B, Enfors S-O: Influence of nitrate starvation on nitrite accumulation during denitrification by *Pseudomonas stutzeri* 229

Xue G-P, Johnson JS, Smyth DJ, Dierens LM, Wang X, Simpson GD, Gobius KS, Aylward JH: Temperature-regulated expression of the *tac/lacI* system for overproduction of a fungal xylanase in *Escherichia coli* 121

Yamanaka H, Fukui T, Kawamoto T, Tanaka A: Enzymatic preparation of optically active 3-trimethylsilylalanine 51

Yamazaki Y, Hesse C, Okuno H, Abraham W-R: Stereoselectivity of microbial oxygenation of metallocene sulphides with different substituent size and central atom 595

Zayed G, Meyer O: The single-batch bioconversion of wheat straw to ethanol employing the fungus *Trichoderma viride* and the yeast *Pachysolen tannophylus* (Short contribution) 551

Zhao QY, Piot JM, Gautier V, Cottenceau G: Isolation and characterization of a bacterial growth-stimulating peptide from a peptic bovine hemoglobin hydrolysate 778

Zverlov V, Piotukh K, Dakhova O, Velikodvorskaya G, Borriss R: The multidomain xylanase A of the hyperthermophilic bacterium *Thermotoga neapolitana* is extremely thermoresistant 245
